PROFILE

Vocational student in Software Engineering (RPL) with hands-on, self-directed experience building full-stack web and mobile applications, from database design through deployment. Comfortable working across the stack and across disciplines — with a working foundation in hardware troubleshooting and network administration alongside software development. Detail-oriented, collaborative, and motivated to apply and grow these skills in a real industrial engineering environment such as PT LEN Industri (Persero).

KEY COMPETENCIES

Core:

Laravel (PHP), Kotlin, Flutter, JavaScript/TypeScript, ReactJS/NextJS, MySQL, PostgreSQL, Git & GitHub.

- Also familiar with: Python, NodeJS, NestJS, C#, C++, .NET, LUA.
- Databases & Backend: MySQL, PostgreSQL, Firebase, SQL Server Management Studio, Oracle.
- Tools & Platforms: Android Studio, Visual Studio Code, Laragon, Linux, Docker.
- Systems & Networking: Hardware troubleshooting, OS configuration (Windows 11, Linux, BIOS setup), local network administration (router configuration, IP/MAC filtering).
- Design: UI/UX design (Figma), Adobe Illustrator.

ACHIEVEMENTS

Delegate & Competitor — West Java Provincial Student Competency Competition (LKS)

Education & Sports Office of West Java Province (Dinas Pendidikan Jawa Barat) 2026

- Selected as a top regional representative to compete at the provincial level in Web Technologies, designing and building full-stack web applications under strict time constraints.

Top Graduate & AI Training Fellow

IBM SkillsBuild & Hacktiv8 Indonesia

- Successfully delivered an end-to-end AI agent final project applying advanced agentic programming workflows.

Project Lead — Software Showcase —

SMKN 1 Ciamis

- Led the end-to-end software development lifecycle for ARTIKA-POS, from database schema design to frontend deployment and copyright registration.

PROJECT EXPERIENCE

ARTIKA POS (Point of Sale System) — Full-Stack Developer

Feb 2026

- Developed a web-based retail management application specifically designed to streamline minimarket operations.
- Built the system using Laravel 12 and Laragon, managing the database architecture to ensure smooth transaction processing and inventory tracking.
- Designed the required data structures by analyzing feature requirements and translating business logic into the application system.

Digital Guestbook KCD Area XIII — Full-Stack Developer

May 2026

- Developed a digital guest registration system for the Regional Branch Office of Education (KCD Wilayah XIII) to streamline visitor tracking.
- Engineered the application to replace manual logbooks, ensuring secure, organized, and easily accessible visitor data management.

Calakan (Ramadan Activity Tracker) — QA Engineer

May 2026

- Created "Calakan," a specialized application designed to log and track daily religious and personal activities throughout the month of Ramadan.
- Developed an intuitive, user-friendly interface to encourage consistent daily engagement and structured activity monitoring.

MAS-PKL (Internship Journal System) — Full-Stack Developer

June 2026

- Built a comprehensive digital journal system to monitor and record student activities during their vocational internship (PKL) period.
- Designed the database and user interface to facilitate seamless daily reporting for students and efficient progress tracking for academic supervisors.

**Other projects are available in my [portfolio](#).*

EDUCATION

SMK Negeri 1 Ciamis	— Software Engineering (Rekayasa Perangkat Lunak)	2024 – 2027
SMP Negeri 1 Cikoneng	—	2021 – 2024
SD Negeri 3 Margaluyu	—	2015 – 2021

CERTIFICATIONS

- AI Ready ASEAN — ASEAN Foundation
- Data Science with Microsoft Fabric — Dicoding
- Intelligent by Design: Build an AI Agent — IBM
- IT - AI Agent for Programming — Hactiv8 Indonesia

**Other certifications are available in my [portfolio](#).*

ADDITIONAL SKILLS

- Exceptional problem-solving and debugging skills, with a strong capacity to resolve algorithm and data structure challenges.
- Skilled in graphic design, capable of designing vector illustrations, logos, and system interfaces.
- Able to work effectively both independently and collaboratively within team environments.
- Strong project management skills, particularly in system architecture and workflow planning.
- Proven leadership experience guiding application development groups and project teams.
